Conclusion

Bibliographie

References should be cited in numerical order as they appear in text; this will be done automatically via bibtex, e.g. @belkin2002using and @berard1994embedding [@coifman2005geometric]. All references, including for the SI, should be included in the main manuscript file. References appearing in both sections should not be duplicated. SI references included in tables should be included with the main reference section.

Figure et tableau

Figure 1: Placeholder image of a frog with a long example caption to show justification setting.

Figures and Tables should be labelled and referenced in the standard way using the `\label{}` and `\ref{}` commands.

Figure

fig : frog

shows an example of how to insert a column-wide figure. To insert a figure wider than one column, please use the `\begin{figure*}...\end{figure*}` environment. Figures wider than one column should be sized to 11.4 cm or 17.8 cm wide.

$$\begin{aligned}(x+y)^3 &= (x+y)(x+y)^2 \\ &= (x+y)(x^2+2xy+y^2) \\ &= x^3+3x^2y+3xy^2+y^3.\end{aligned}$$
